Python for Data Analysis and Visualization

Instructor: Claudia Carroll

Class 3: Introduction to Pandas

In-Class Exercises

1. Write the code to print each country in the data file gdp_africa.csv and that country's mean gdp between 1952 and 1982.

2. Now write the code to print each year (as represented by the column headings) in gdp_africa.csv and the mean GDP in Africa that year. How does your code differ from part one?
